HOW TO PREPARE A COMPARABLE SALES ANALYSIS

This Comparable Sales Analysis Form is an organizer to help you determine if the equalized assessed value of your property exceeds the market value of your property and to aid you in presenting your argument to the assessor and, if necessary, the county tax board.

The first step is to select legally usable comparable property sales, i.e., open market sales between willing buyers and sellers which would be competing with your property if both were offered on the market at the same time. If a typical buyer looking to purchase your property would also consider purchasing your comparable property, because it has similar utility, location and attractiveness, it's probably a good comparison. Next, use the Comparable Sales Analysis Form to compare your property and the properties that have sold.

1. Properties' Identification-Select at least three, if possible, properties that have sold which are the most similar to your property. On the "Block and Lot" line, enter your property's identification numbers under "subject" and the numbers of the first three comparable properties under "comparable sales" #1, #2 and #3. On the "Address" line, enter your address and the address of each comparable property sold. The "Q" line is only used for condominiums and qualified farm properties.
2. Assessed Value- Enter only the "assessed value" for your property (the subject). Your total assessed value is already on all completed appeal forms. Remember, you are trying to measure market value, not assessed value.
3. Sale/Purchase Price - Enter the sales/purchase price as it appears on the deed. You may confirm prices with public records or with the municipal assessor's office.
4. Sale Date- Enter the sales date, i.e., closing date or deed date. You may confirm dates with public records or with the municipal assessor's office.
5. Lot Size-Enter dimensions, as 50' x 150' (feet), or acres, as 1.25 acres or .50 acres. Note other aspects of the lot as "wooded," "view," "steep," "irregular shape," etc. under "Additional Comments."
6. Location-Here your property's location is the standard; use comparative terms, for example, "similar," "better" or "worse," for each comparable sale property. Explain any significant differences in location in "Additional Comments."
7. Proximity to Subject-Estimate the distance, in miles or blocks, between your property and the comparable properties sold. If a comparable property is in your immediate area write "neighborhood," "next door" or "one block," etc. If you exclude a similar nearby sale property in favor of one that is farther away, you should be able to explain your reason.
8. Age-Enter the year built.
9. Condition- Accurately state the general condition of your property as "good," "fair," "poor," "very good," or "excellent" and the condition of your comparable sales properties using the same terms. Be prepared to justify your statements by your own investigation of each sale. View each comparable property from the exterior and provide at least one photograph of each. Also try to utilize a local multiple listing service, listing agent, or contact the seller, or buyer to ask about the condition of the comparable properties.
10. Style- Identify style as "ranch," or one story, "colonial" or two story, "cape" or 1.5 story, "bi-Level," "split level" or "contemporary," etc. Photos help the assessor and county tax board commissioners recognize the style and attractiveness of the properties.
11. Square Feet or Gross Living Area, (GLA)-Living area includes all livable space above basement level or above grade and is based on gross or exterior dimensions. Exterior dimensions of 25' x 40' and two full stories would have approximately 2,000 square feet of Gross Living Area. The same exterior dimensions with one and one half stories would have about 1,500 sq. ft. of GLA. Your assessor can provide this number for your

property and each comparable property sale. Try to settle any factual issues regarding gross living area, etc. with the assessor prior to a county tax board hearing.

12. Number of Living Units-A single family dwelling is 1 living unit; use 2, 3, or 4 for a two to four family residence. Do not compare a single family dwelling with a multi-unit dwelling. You may compare a multi-unit dwelling with other multi-unit residences having different numbers of dwelling units, as long as they're not single family. An in-law or domestic suite is not a multi-unit dwelling, unless this suite may be legally rented to a non-family member. If so, identify this on this line, as "in-law suite included," and explain under "Additional Comments."
13. Total Rooms/Bedrooms/Baths-Report this as "8/4/2.1" for an eight room, four bedroom, two and one half bath property; for three half baths in the same property "8/4/2.3." Include a "bonus" room in the room count and explain under "Additional Comments." Report basement baths here w/"Added Comments" and unusual positive/negative characteristics of the property layout w/Added Comments.
14. Basement Size/Finish-Write "full," "partial," or "crawl space" or "slab" if none. Enter percentage of finished area, as "100%," "75%," (three quarters finished) or "50%" (half finished). Note if there is a full or half bath on basement level here. Explain quality of the finish and factors as "walk out access" under "Additional Comments."
15. Type of Heat-Write in fuel first, as "gas," "oil," "electric" or other; then if the system is "forced air," "hot water" or "steam." Write number as (2) or (3) for properties with 2 or 3 separate systems.
16. Central Air Conditioning-Usually a "yes" or "no" answer. If the property has central air but it's not operating, still indicate central air is present and explain under "Additional Comments." If central air is only for first or second floor of a two story property, for example, write "2nd floor only" here.
17. Number of Fireplaces-Enter the number, for example, 1 to 4.
18. Garage (size)/Outbuildings-Example, write "2 car att." for a two-car garage attached to the property or "1 car det." for single car, detached, free-standing garage. Typical outbuildings include sheds, barns, cabanas, etc. Explain condition, size and quality etc., under "Additional Comments."
19. Porches/Decks/Patios- Indicate size, e.g., 10 x 12 or 15 x 25, and character of each. Have a general idea of construction quality and condition.
20. In-Ground Pools-Report size, e.g., 20 x 40 or 18 x 36, and material, e.g., steel wall with vinyl liner, or concrete/gunite. Note the age, if possible, and overall condition of the pool, as best you can. Removable above ground pools are generally not assessed.
21. Miscellaneous Items- Identify and describe.
22. Additional Comments-In this area, add comments to cover key aspects of your property (the subject) and each comparable property which may not be adequately identified on the form, such as "flood zone location" indicating how often, how severely and when the property last flooded. See example comments on the sample form in these instructions. If you have questions, ask your assessor for help.

***Remember you are using your comparable properties to substantiate the market value of your property (the subject property.) When deciding whether to appeal, it may be useful to evaluate the entries as superior or inferior to your property. If your entries are mostly inferior, the average of the sale prices should be lower than your property's value. If your entries are mostly superior, then the average of the sale prices should be higher than your property's value. If your items are mostly the same, the average of the sale prices of the comparable sales properties should be similar to your property's market value. An assessed value should not exceed the market value of a property. All properties in a municipality should be assessed at the same level. Bring this form when you meet with the assessor. Submit this form with all copies of your filed appeal at least seven days prior to your hearing before the county tax board commissioners.
